

OUR PASSION FOR PROPOLIS

OUR PROPOLIS

Propolis is a substance made from plants and collected by bees. Propolis volatile fraction can be spread naturally when the sun warms up the buds of plants, which in their turn diffuse it into the environment. Propolis volatile fraction gives a pleasant undergrowth perfume with therapeutics properties. That is why sanatoriums used to be built in wooded areas, where the volatile fraction - also known as "fresh air" - helped patients to recover and recuperate. The volatile fraction of propolis spreads in the environment its valuable therapeutic properties and a pleasant underwood aroma.

KONTAK propolis comes from unpolluted areas, far from urban, industrial and nuclear pollution. It therefore does not contain any heavy metals, pesticides or antibiotics.

PROPOLIS : THE PHARMACY OF BEES:

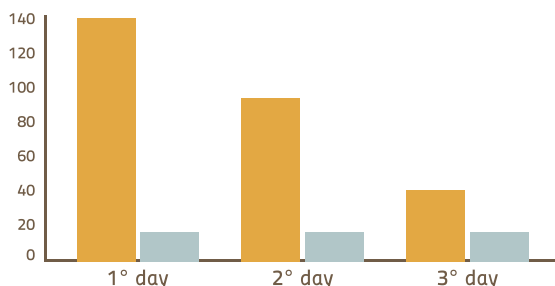

- useful in colds such as rhinitis, sinusitis, pharyngitis and tonsillitis: it has an **antibiotic** and **anti-inflammatory** effect.
- Performs an **antispasmodic** and analgesic response.
- Helps to prevent cold and flu: it has an **antiviral effect**.
- **Immunostimulant**: strengthens the body's defenses.

KONTAK combines a passion for propolis with a scientific approach, investing in research and development, and collaborating with doctors and specialists.

The demonstration of the validity of PropolAir system is confirmed by several scientific studies, including:

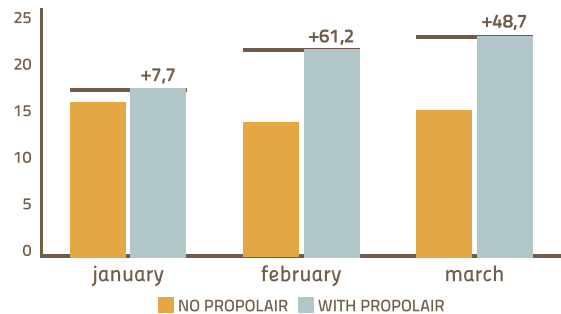

STUDY "MICROBIAL REDUCTION IN CLASSROOM SCHOOL - AIR SANITATION" (Biologi Italiani Feb.'96).

The first study, carried out by the ASL 5 of Collegno (TO), confirmed that, using the propolis diffusers KONTAK in a classroom for three consecutive days, the resulted in a dramatic reduction of airborne microbes up to 71,3%. An environmental sanitation completely natural!

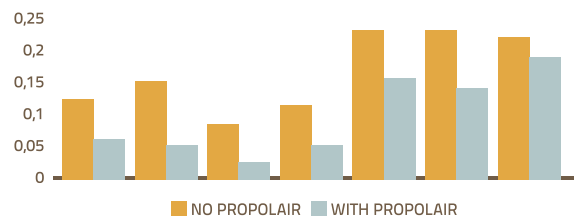

STUDY "PREVENTION AND INCREASE IMMUNE SYSTEM" at the Nursery Association (Milan)

The second scientific study was carried out at the Association House Nursery Kindergartens (MI). Throughout the period in which they used the PropolAir diffusers, the number of children's absences due to illness significantly decreased and there were no manifestations of allergy or intolerance to propolis. In addition, during the following year, there was a higher frequency up to 62,1% in February.

STUDY "REDUCTION BENZENE AND IPA"

The study carried out by the Chemical Laboratory of the Chamber of Commerce of Turin, has showed that with the use of PropolAir diffusers they obtained a reduction of up to 82% of Pyrene and Fluoranthene, waste substances from the combustion of fuels for cars, defined by OMS (WHO) as carcinogens. The removal of benzene was 15%.

WHY BREATHING PROPOLIS?

For two simple, but important reasons:

- Superiority of the extraction system as "the volatile fraction of propolis has shown, compared to the extractive fraction taken orally, a probiotic action exaltation general. due to the fact that the intake is done, as well as through the respiratory pathway and percutaneous, also and essentially through the olfactory nerves, which are located in the nasal mucosa "(from" "Curarsi con la Propoli"- Prof. L. Pecchiai, "Dimensione Natura, 1995")
- Easy method of taking.

DIFFUSERS OF PROPOLIS

KONTAK has developed and patented an innovative system that diffuses into the air the volatile fraction of propolis: the only one of its kind able to fully exploit the properties of sanitizing the air and its probiotic action on the whole organism.

PROPOL THERAPY MODEL

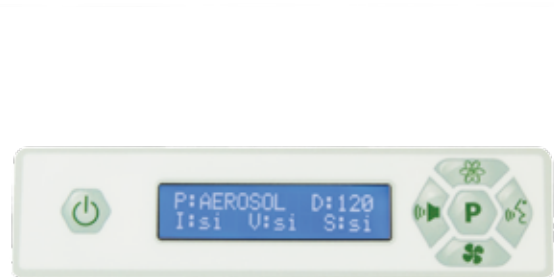

The new PROPOL THERAPY diffuser (A4) provides a dual function:

1. ROOM PROGRAM

Environmental sanitation completely natural with the spread of the volatile fraction of propolis. Scientific study shows the reduction of airborne microbes up to 71, 3% in only 3 days of use (Biologi Italiani, 1996).

2. AEROSOL MASK PROGRAM

Breathing the best quality Italian propolis directly with the mask.

The diffuser PROPOL THERAPY has multifunction keyboard which allows to customize its use.

IT IS POSSIBLE, IN FACT, ACTIVATE OR DEACTIVATE:

IONIZER

The deactivation allows the use of the diffuser also in the presence of children under 3 years of age.

FAN

The activation allows of saturating environments up to 60 square meters.

SOUND

The function allows to exclude the acoustic sound.

BASE MODELS

The base diffusers with their small size are perfect for all rooms; their designs harmonize with any decor.

PropolAir diffusers spread the volatile fraction of propolis completely and selectively.

The **A1** basic version is also available in **A2** version with Ionizer, with new multi-function keyboard that allows you to customize use.

The ionizer enhances the properties of sanitization of propolis. In fact, through the process of ionization, the propolis molecules released into the air, assume a negative electrical charge and attract the opposite polarity particles, such as bacteria, smoke, viruses and dust, on which they practice antiseptic, antibiotic and bacteriostatic properties of propolis.

The **A1** and **A2** models offer coverage up to 30 square meters.

WOODEN MODELS

With a real wood finish, they are ideal for any room: offices, waiting rooms, shops and public places. In three shades: natural, cherry and wenge. They have the same operating and effectiveness characteristics of the base models.

The **L1** version is also available in **L2** version with ionizer, which enhances the properties of sanitization of propolis.

In fact, through the process of ionization, the propolis molecules released into the air, assume a negative electrical charge and attract the opposite polarity particles, such as bacteria, smoke, viruses and dust, on which they practice antiseptic, antibiotic and bacteriostatic properties of propolis.

The **L1** and **L2** models offer a range of up to 30 square meters. The **L3** wooden model is equipped with ionizer and fan that allows to double the radius of action of the ionized propolis, providing coverage up to 60 sqm.

PROPOLINA MODELS

This cute, honeybee shaped diffuser protects the children, harnessing the beneficial properties of propolis and surrounds your child as they sleep with the light warm and cosy glow of its antennae.

The **P1** version is also available in **P2** version with ionizer. The ionizer enhances the properties of sanitization of propolis. In fact, through the process of ionization, the propolis molecules released into the air, assume a negative electrical charge and attract the opposite polarity particles, such as bacteria, smoke, viruses and dust, on which they practice antiseptic, antibiotic and bacteriostatic properties of propolis.

Propolina is also available in a version in WOOD, (**P3** and **P4** with ionizer): a warm and harmonious proposal made of Italian wood and water-based paint to meet the needs of consumers who are increasingly eco-conscious.

P3 model-based wood has the functional characteristics of **P1** model and **P4** wooden model ionizer has the functional characteristics of **P2** model. Models with ionizer are recommended for children older than 3 years.

All Propolina models provide a range of up to 30 square meters.

CAR DIFFUSER

PropolAir Car is the ideal solution for those who drive their car in urban traffic, where there is a high pollution concentration level.

It is simple to use, and thanks to its adjustable base can be plugged into cigarette lighter socket, fitting any car model.

PROPOLIS CAPSULES

PropolAir diffusers use exclusively Kontak capsules.

Each capsule is disposable and has an operating life of approximately 122 hours. After such time, it is necessary to reset the diffuser and make the change of capsule to start a new cycle. To get the best results in the prevention of respiratory diseases and for a complete environmental sanitation, Kontak recommends the use of the diffuser 24 hours/7 days a week. The capsules used by Kontak are made of glass, ecological and recyclable material par excellence.

P+B CAPSULES

P+B capsules contain 95% Italian propolis and 5% Boswellia Serrata, always known for its anti-inflammatory properties. Such synergy exalts the properties of propolis, enhancing its benefits.

BIO CAPSULES

The capsules are also in BIO version: 100% Italian Organic propolis, to offer the guarantee of a propolis even more safe, healthy and active.

DIETARY SUPPLEMENTS

A full range of Organic Italian Propolis to disinfect and to soothe throat inflammations.

P+B LINE

P+B THROAT SPRAY | 20 ml

For the Relief of sore throat and of the respiratory tract.

Ingredients:
Water, high fructose corn syrup, alcohol, Propolis, Boswellia, Honey, Citric Acid and natural aroma.
How to use:
2 sprays 4 times a day.

P+B NASAL SPRAY | 15ml

To facilitate breathing and for cleansing the nasal cavities.

Ingredients:
Water, Propolis, Boswellia, Potassium Sorbate, Sodium Chloride.
How to use:
Remove the cap and, after introducing the dispenser into the nostrils, spray 1 or 2 times. Repeat for 2 times a day, as needed.

Medical device useful for protection, cleansing and hydration of the nasal mucous membranes.

SYRUP P + B | 150ml

For a balsamic effect on the throat and respiratory tract.

Ingredients:
Honey, high fructose corn syrup, apple juice, Propolis, Boswellia, Ascorbic Acid, Citric Acid and natural flavorings.
How to use:
2 tablespoons per day, pure or diluted in a little water.

ORGANIC LINE

ORGANIC PROPOLIS EXTRACT | 30ml

For the prevention and well-being of respiratory tract.

Ingredients:
Propolis, alcohol and water.
How to use:
20 drops a day.

ORGANIC PROPOLIS THROAT SPRAY | 20ml

For the relief of sore throat and upper respiratory tract.

Ingredients:
Water, high fructose corn syrup, alcohol, Propolis, honey, citric acid and natural aroma.
How to use:
2 sprays 4 times a day.

ORGANIC PROPOLIS SYRUP | 150ml

For a balsamic effect on the throat and respiratory tract.

Ingredients:
Honey, high fructose corn syrup, apple juice, Propolis, water, echinacea, currant, black currant, citric acid and natural flavorings.
How to use:
2 tablespoons per day, pure or diluted in a little water.

ORGANIC PROPOLIS EXTRACT | 30ml ALCOHOL FREE - KIDS

For the prevention and well-being of respiratory tract.

Ingredients:
High Fructose Corn Syrup, Propolis, natural aroma and citric acid.
How to use:
20 drops per day.

ORGANIC PROPOLIS THROAT SPRAY | 20ml - KIDS

For the relief of sore throat and upper respiratory tract.

Ingredients:
High Fructose Corn Syrup, Water, Propolis, raspberry juice and ascorbic acid.
How to use:
2 sprays 4 times a day.

ORGANIC PROPOLIS SYRUP | 150ml KIDS

For a balsamic effect on the throat and respiratory tract.

Ingredients:
Honey, high fructose corn syrup, apple juice, Propolis, water, rosehip, blackcurrant, carpino, ascorbic acid, citric acid and natural flavorings.
How to use:
2 tablespoons a day.

PROPOL CAPS

1 box contains 20 capsules

VEGETABLE CAPSULES 100% ORGANIC ITALIAN PROPOLIS. Excipients and preservatives free. Propolis is a resinous substance balsamic, essentially consisting of flavonoids, terpenes and essential oils, with recognized beneficial properties in case of intestinal peristalsis, (with improvement of the secretion of gastric juices) and for the prevention of flu and catarrhal forms of the respiratory tract.

Ingredients:

100% Organic Italian Propolis.

How to use:

As needed, recommend taking one or more capsules daily.

PROPOL ACTIVE

1 box contains 24 tablets

Propolis ITALIAN ORGANIC at a concentration of 20%, packaged in convenient chewing tablets for a systemic effect, to support the body, especially during seasonal changes when it is more exposed to cold problems. Useful for the relief of the oral cavity.

Ingredients:

Gum arabic*, Propolis*, sweetener a basis of Agave crystals*, Sodium Citrate, Calcium carbonate, natural flavor berries. *From organic farming.

How to use:

It is recommended to take 1 to 2 tablets, 2-3 times a day, to dissolve slowly in your mouth.

PROPOLDAY

1 box contains 15 vials

Food supplement based on propolis for adults and children. It naturally strengthens the body, enhancing the immune system against external aggression.

It is recommended for using at the approach of winter and during season changes.

The effectiveness and the benefits of organic Italian propolis in single-dose vials practices, taken daily.

Ingredients:

ADULT: Propolis*, Alcohol*, water.

KIDS: High fructose corn syrup*, non-alcoholic Propolis extract (20%)*, natural flavor.

How to use:

1 vial per day.

BEE ENERGY

1 box contains 12 bottles

Food supplement with ITALIAN AND ORGANIC ingredients containing fresh Royal Jelly, Pollen, Propolis, Honey and Blueberry juice; useful ingredients in situations characterized by excessive physical and mental fatigue.

BEE ENERGY is a valuable help for those who need a boost of energy, even at school age children and teenagers, improving the physical and mental performance and acting favorably on the effects of stress.

Ingredients:

Fructose, Blueberry Juice, Italian* Honey, Propolis extract* non alcoholic, fresh Royal Jelly*, lemon juice*, Essential Oil. Rosemary*. *From organic farming.

How to use:

10 ml per day in the morning.
